Subitising Puzzles Theme:
Creatures under the Sea!

What is Subitising?

Subitising is the ability to recognize the number of items without counting. This is a fundamental skill in the development of number sense.

What you need to do?

Print the activity sheet and cut the puzzles out accordingly. For durability, you may choose to laminate it.

To provide variations in learning, parents can split the puzzle pieces and encourage children to engage in a game. This adds a different learning element rather than just matching.

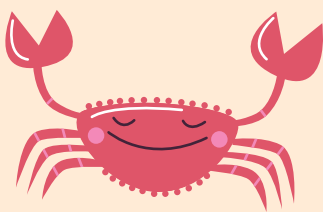

Each puzzle contains:

- 1 piece of number in numeral and word form
- 1 piece with a ten frame
- 1 piece with subitising object

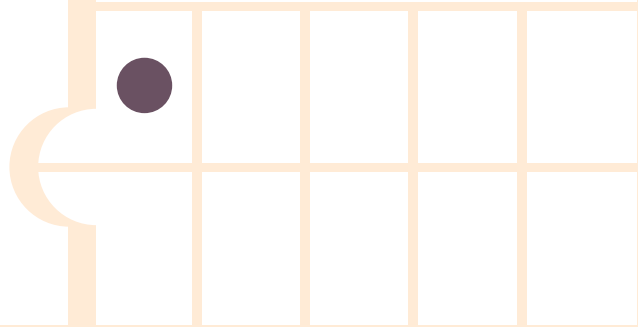

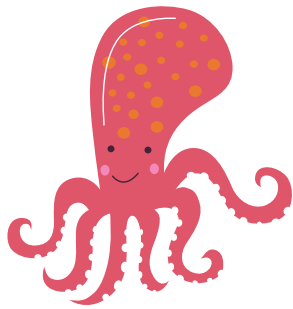

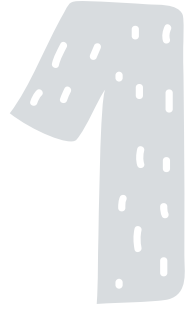

Benefits

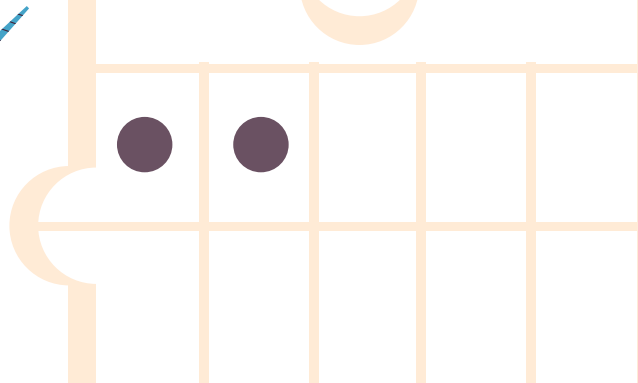

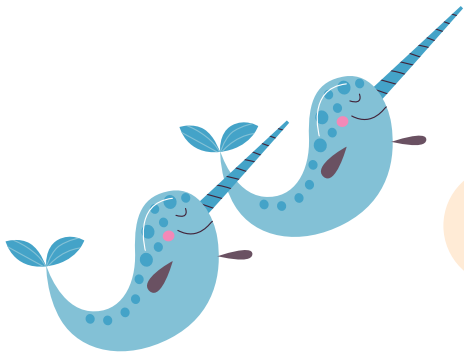

These subitising puzzles are great to strengthen subitising skills up to 10. Along with learning the number of items, the worksheet is accompanied with the numeric representation as well as the number of sea creatures. This enables your child to learn the association between the value to the number of items that should accompany.
