Subitising Puzzles Theme:
Snail

What is Subitising?

Subitising is the ability to identify a quantity quickly, without counting.

What you need to do?

1. Print the worksheet and laminate game board.
2. You will need either a regular die with 1-6 dots or a die with numbers 1-6.
3. You will need some form of manipulatives, e.g. blocks, cubes, chips etc.

How to play?

This game can either be played individually or with two players.

To play individually, each child has their own game board and their own die. Each child will roll the die and cover the snail with the corresponding number. Keep rolling until all the snails are covered.

For two players, the players share the game board and die and take turns to roll. Each player will need their own colour block and the winner will be the player with the most snails covered.

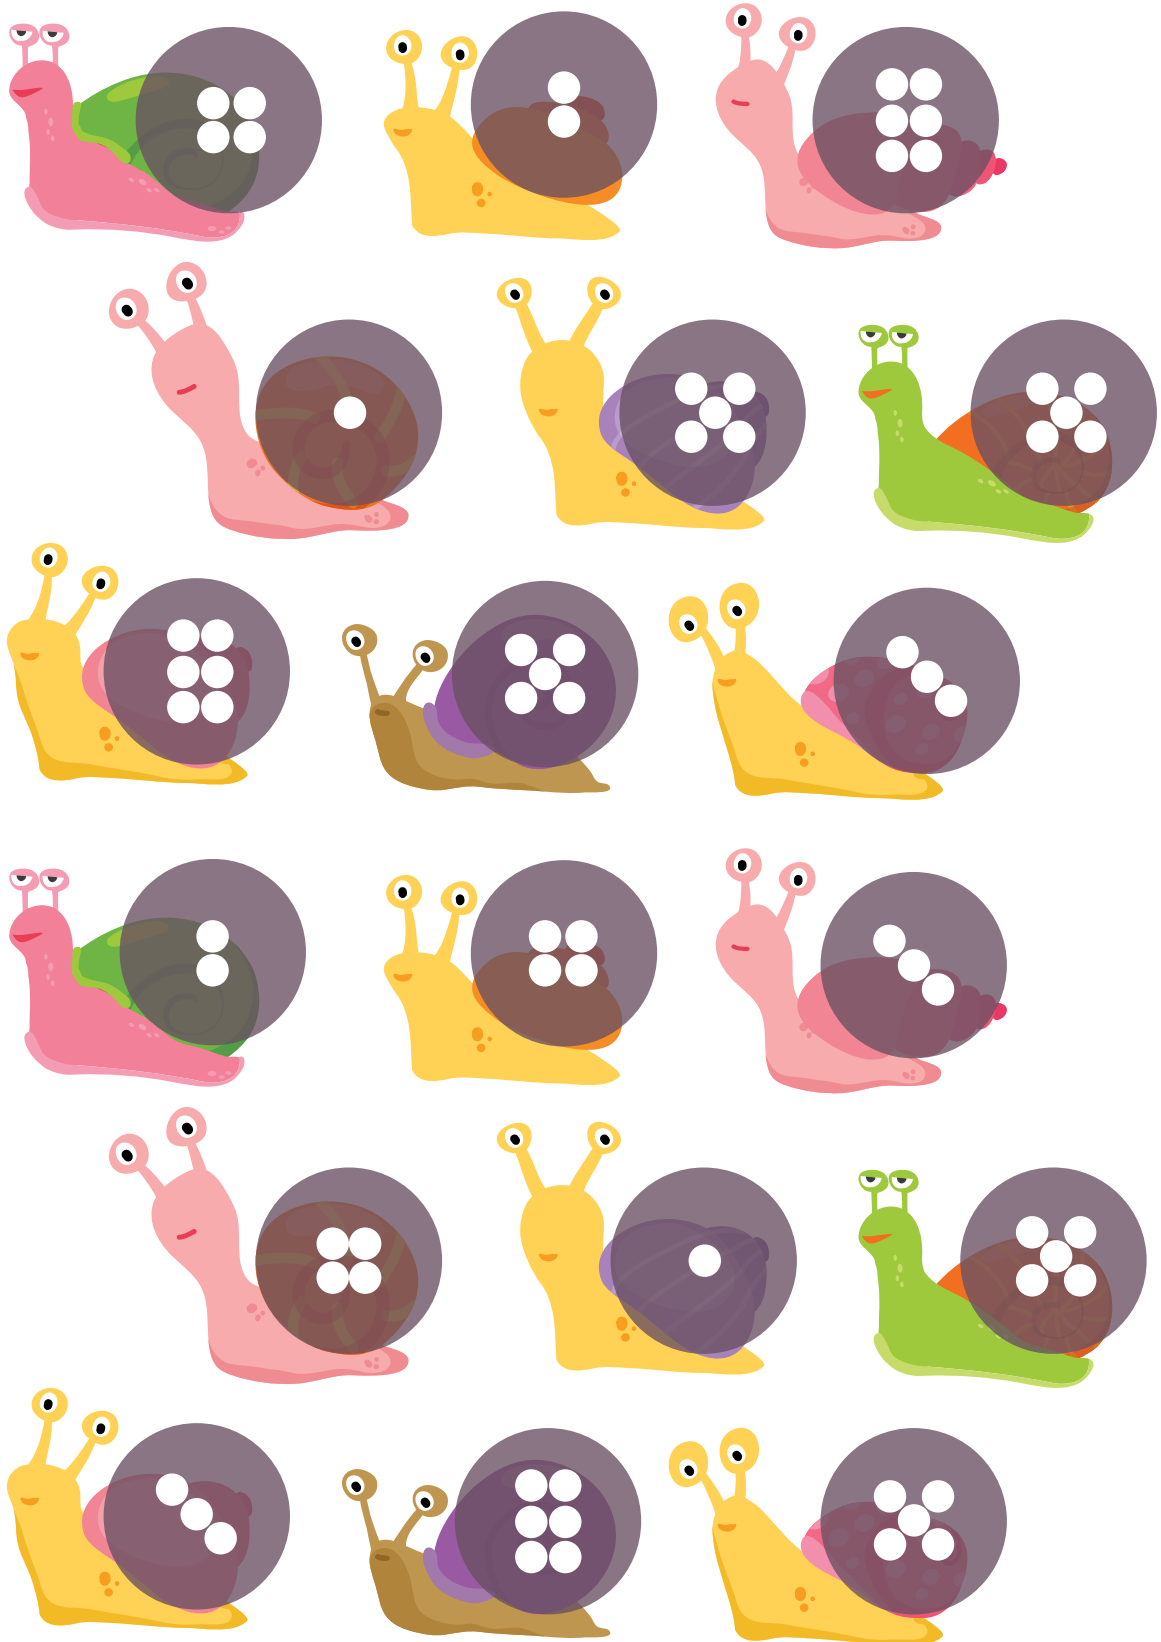

Purpose

These subitizing puzzles are great for strengthening children's ability to recognise a small group of objects without counting them.

This practice is a fundamental skill in the development of number sense.
